LARGE ANIMAL TECHNICAL RESCUE TRAINING LOOPS RESCUE SYSTEM

The loops rescue system is a simplified system that fits in a duffel bag and is readily available to provide critical timely rescue. This training will introduce participants to the loops rescue system as well as valuable information from Dr. John Madigan regarding components of equine technical rescue, use of the Incident Command System, medical issues associated with trapped or down horses, as well as the roles of veterinarians, first responders and volunteers in technical rescue situations.

Instructor: Dr. John Madigan, DVM, Distinguished Professor – Emeritus
Founder of UC Davis Veterinary Emergency Response Team

<https://loopsrescue.com/>

3 hours of lecture, demonstration and participation

Proper use of the tail tie, use of the loops as an emergency halter and loops to assist loading a reluctant horse in a trailer will be demonstrated!
